## REGULATIONS REGARDING ANIMALS ON THE BEACH

- 1 Dogs are allowed to bath from 18:00 to 10:00 of the following day and from 13:00 to 15:00.
- 2 Dogs are allowed on the beach as long as they are micro-chipped or have a tattoo with an identification number. All dogs must have had the anti-rabies vaccination. The pre-contagion vaccine against rabies is obligatory and this must be demonstrated with the prescribed veterinary certification (animal passport, any documentation regarding the animal's state of health).
- 3 For the well-being of their own animals and others, dog-owners are recommended to vaccinate them periodically against the principal infectious diseases (distemper, leptospirosis and parvovirus), and also against the principal parasitic diseases (parasites). Dogs with cardiovascular pathologies should not be brought to the beach.
- 4 All dogs must have a flea-collar or equivalent prophylaxis. When on the beach, the dog must be kept on a lead, at least 1.5 metres long, that is adequately anchored to the ground, ideally tied to a post that is well dug into the sand so that the lead cannot come undone.
- 5 The owner or keeper must also have a muzzle with him, either rigid or soft, to put on the dog when necessary, in the event of any risk for the safety of people or other animals, whenever requested by our internal staff or by the competent Authorities.
- 6 Whoever accompanies the dog must make sure that the animal cannot reach other animals or persons nearby. A bowl of water must be available and accessible to the dog. Furthermore, the animal must be given adequate shade.
- 7 Any solid excrement must be removed and disposed of in the appropriate containers for waste and rubbish, while urine must be rinsed abundantly and washed away with sea-water. The owner is held responsible for this.
- 8 As far as possible, the person accompanying the dog must keep the animal from prolonged barking and from indulging in excessively vivacious behaviour. If this rule is not observed, the dog will have to be removed from the beach. Also the staff supervising the beach have the faculty to remove unruly animals and their judgment is unquestionable. In any case, access to the beach is prohibited to dogs with an aggressive nature and to bitches on heat.
- 9 Approximately every two hours whoever accompanies the dog is held responsible for taking the animal off the beach for a walk.
- 10 The owner of the bathing establishment decides which beach-umbrella to assign to the family with the dog, and reserves the faculty to make any changes that he considers opportune in order to guarantee a good standard of service for all customers. Each beach-umbrella may not be occupied by more than 4 persons and 2 dogs.
- 11 Dogs may not in any circumstances be left unguarded and free to roam around. The owner is to be held subject to Italian civil and penal laws and will be considered responsible for any damage caused by the animal. Our internal staff will monitor the beach and ensure that the regulations are respected.
- 12 In the event of any breaking of the rules described above, the offender will be obliged to leave the bathing establishment. Furthermore, the Management reserves the faculty to contact the competent administrative and health Authorities (local Police and local Health Units), in the case of non-observance of the regulations that are obligatory by law, such as the lack of a microchip or identification, for instance, or not respecting the obligations regarding dangerous breeds of dog.
